Professional Summary

Aspiring Software Engineer with hands-on technical experience and a growing foundation in software development, customer solutions, and systems troubleshooting. Currently enrolled in the TrueCoder Bootcamp, focusing on C#, the .NET ecosystem, Python, and modern development workflows.

Brings a unique combination of technical field service experience, technology and marketing sales, and practical exposure to AI-assisted development tools including multiple Large Language Models (LLMs). Known for strong problem-solving abilities, adaptability, communication skills, and the ability to quickly learn and apply new technologies.

Technical Skills

Languages

- C#
- Python
- JavaScript
- HTML5
- CSS3

Frameworks & Tools

- .NET Framework
- Visual Studio
- Git & GitHub
- REST APIs
- Microsoft Office

Core Concepts

- Object-Oriented Programming (OOP)
- Debugging & Troubleshooting
- Technical Documentation
- Problem Solving

- Version Control Fundamentals

AI & Emerging Technologies

- Experience utilizing Large Language Models (LLMs) for:
 - Development workflows
 - Research & troubleshooting
 - Process improvement
 - Technical learning
-

Technical Development & Training

TrueCoder Bootcamp — Current Student

- Building applications using C# and the .NET Framework
 - Learning software development best practices and clean code structure
 - Strengthening debugging and troubleshooting skills
 - Applying programming concepts to real-world projects
 - Developing experience with version control and collaborative workflows
 - Expanding knowledge of front-end and back-end development concepts
-

Professional Experience

Service Manager — Generator Supercenter

- Coordinated service operations, scheduling, and technical support
- Assisted technicians with diagnosing and resolving complex issues
- Improved workflow efficiency through organization and communication
- Strengthened leadership, troubleshooting, and systems-thinking abilities

Sales Consultant — MS Solar LLC

- Delivered solutions-based sales in a technical product environment
- Explained complex technical concepts to customers in a clear and approachable manner
- Built strong customer relationships through trust and education
- Combined technical understanding with customer-focused communication

Generator Technician — AirSouth

- Diagnosed and repaired generator systems
- Performed maintenance and troubleshooting on mechanical and electrical systems
- Maintained high customer satisfaction through dependable service

Certified Technician — MS Solar LLC

- Performed inspections, maintenance, and repair services on generator systems
- Assisted in maintaining operational reliability and safety standards

Electrical Apprentice — Moses Electric Inc.

- Assisted with wiring, installations, and troubleshooting
- Developed foundational knowledge of electrical systems and safety procedures
- Strengthened structured problem-solving and attention to detail

Equipment Operator — Pogue Earthmoving

- Operated heavy equipment in high-pressure work environments
- Performed routine maintenance and safety inspections
- Followed strict operational and safety procedures

Additional Strengths

- Technology and marketing sales experience
- Strong communication skills with both technical and non-technical audiences
- Quick learner with strong adaptability to new technologies and systems
- Detail-oriented with a practical problem-solving mindset
- Experience working in fast-paced technical environments

Education

Holmes Community College

Automotive Technology Program — Completed

Certifications

- Generac Air-Cooled Certification
